

Interactions Among Living Things and Their Environment

How living things depend on one another and their environment to survive

OUR LEARNING GOAL

Today, we will learn to...

identify and describe how living things depend on one another and their environment to survive.

✓ Spot connections

✓ Describe what living things need

✓ Explain how needs help survival

LET'S EXPLORE!

What do you think?

“Can a plant survive without water?”

“Can a bird survive without food?”

Let's find out together!

HOW LIVING THINGS INTERACT

**Living things depend on each other and their environment
for:**

FOOD

energy to grow

PROTECTION

help staying safe

SHELTER

a place to live

RESOURCES

other survival needs

They also need water, air, sunlight, soil, and safe places to live.

EXAMPLE 1

Bee + Flower

A bee gets food from flowers and helps flowers grow by pollinating them.

EXAMPLE 2

Bird + Tree

A bird uses a tree for shelter and to build its nest.

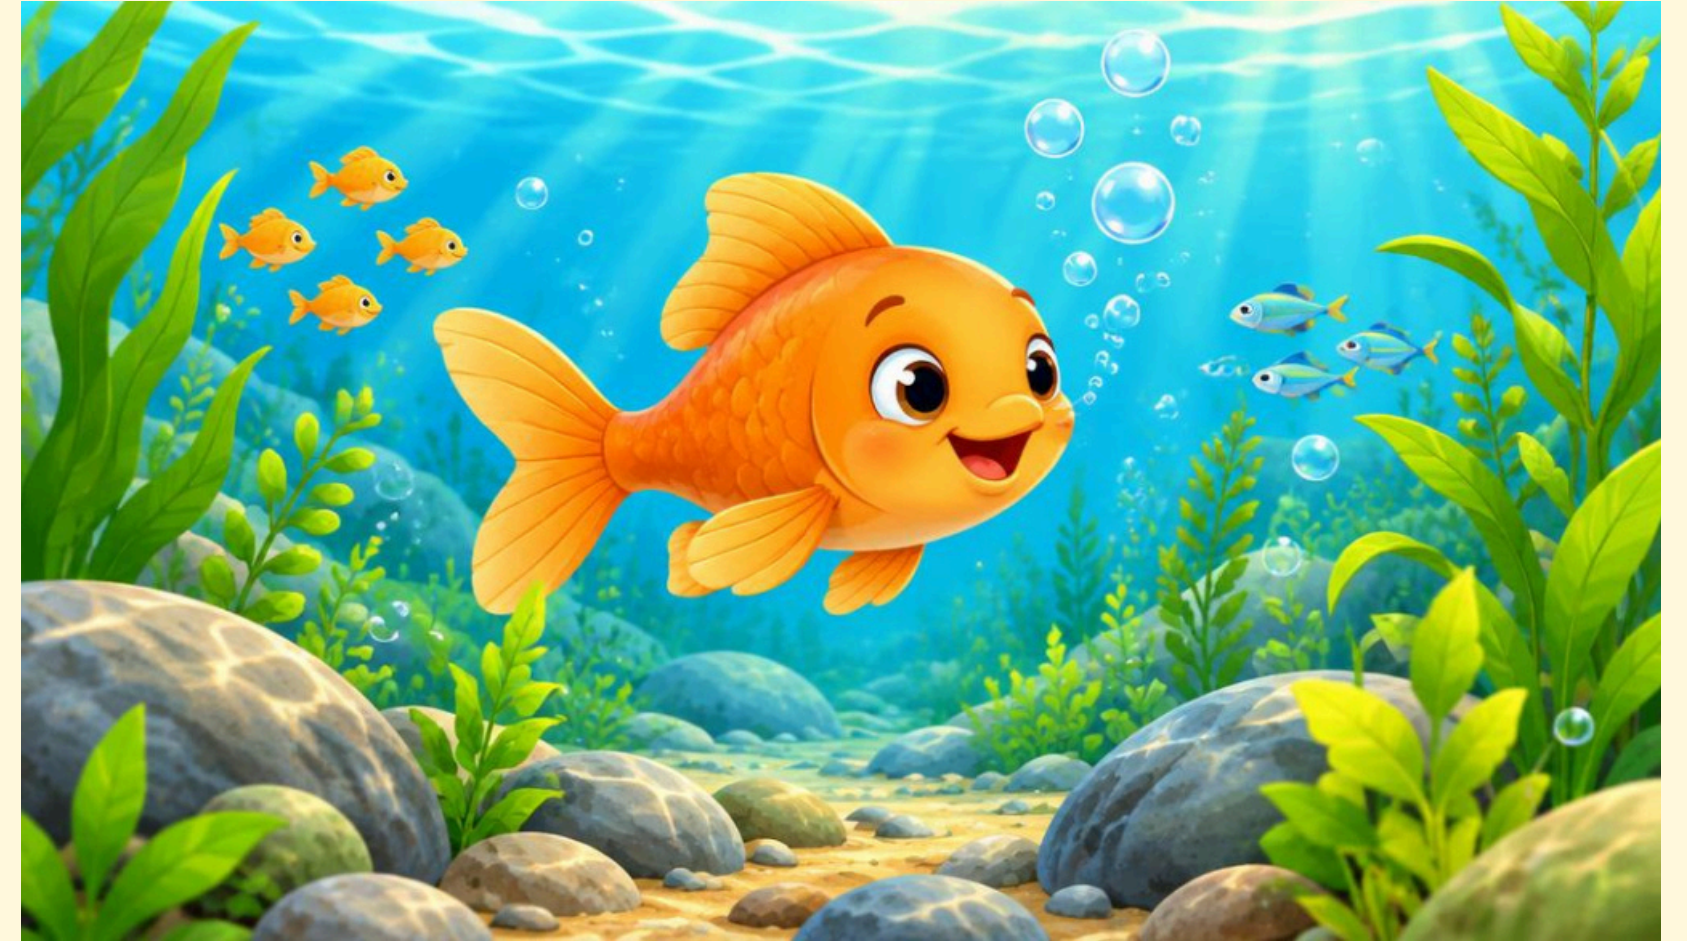

MORE EXAMPLES

Living things need the right environment

Plants need sunlight to make food and grow.

Fish depend on water to live and breathe.

Who depends on what?

Match each living thing with what it depends on! Draw lines or say your answers.

BIRD

.....

TREE

FISH

.....

WATER

BEE

.....

FLOWER

PLANT

.....

SUNLIGHT

ANIMAL

.....

WATER

Assessment Questions

Choose the best answer.

1 What may a bird use a tree for?

A.Shelter B.Electricity C.Clothing D.Transportation

2 What does a fish depend on as its environment?

A.Water B.Sand only C.Air only D.A classroom

3 What can a bee obtain from flowers?

A Food B Shoes C Shelter only D Soil

4 What do plants need from their environment?

A.Sunlight and water B.Toys and books C.Clothes and shoes D.Television and electricity

5 Why do living things depend on one another and their environment?

A.To help meet their needs and survive B.To become nonliving C.To stop growing
D.To change their species

CHECK YOUR WORK

Answer Key

Great thinking! Every answer is A.

✓
1: A

✓
2: A

✓
3: A

✓
4: A

✓
5: A

You found the connections!

Key Takeaways

1. Living things depend on one another.

2. Living things also depend on their environment.

3. Food, water, air, shelter, and other resources help living things survive.

4. Interactions among living things and their environment support life.

GREAT WORK, SCIENTISTS!

**Thank you for
learning with us!**

Do you have any questions?

Keep looking closely—nature is full
of connections.
