

HUMAN BODY SYSTEMS

LEARNING COMPETENCIES

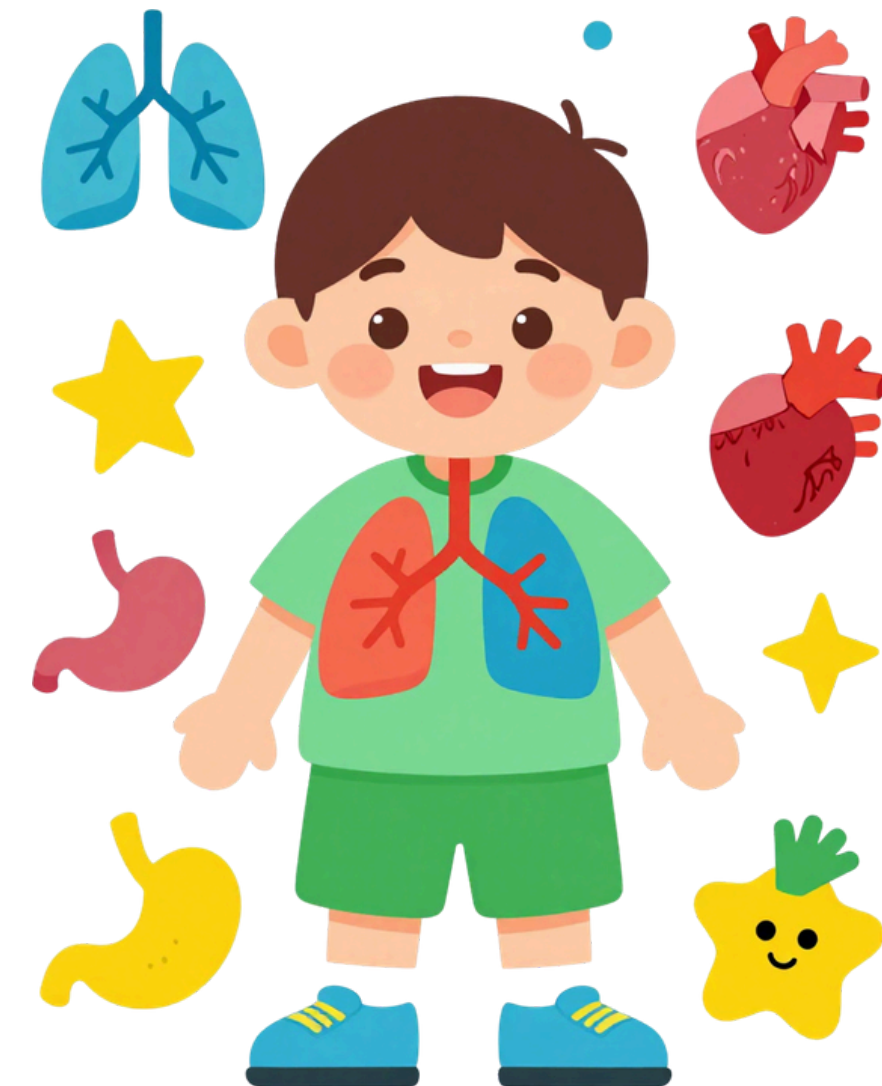

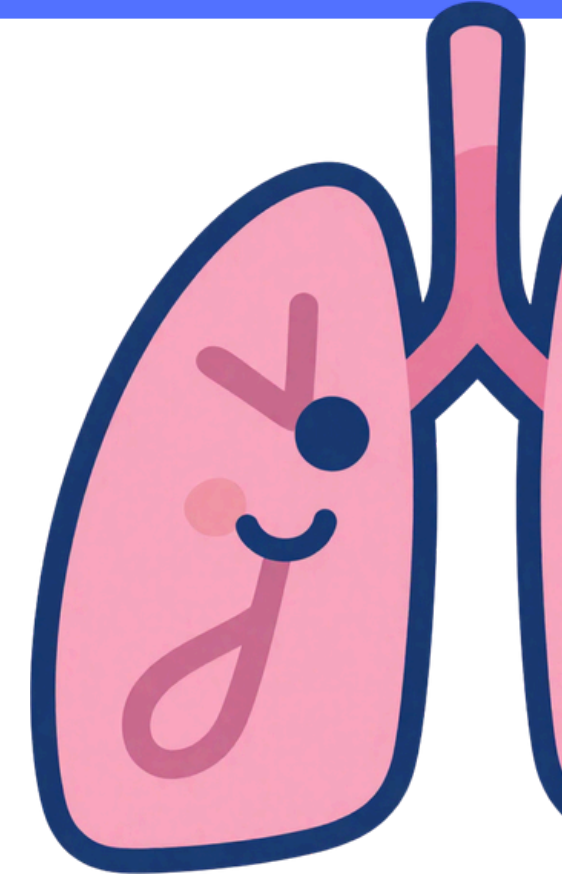

🫁 Identify the major parts of the digestive, respiratory, and reproductive systems from pictures and diagrams.

💡 Explain how each part helps the body function.

🥦 Identify ways to care for each body system.

🔍 Recognize body systems from illustrations and real-life examples.

💪 Practice healthy habits to keep all body systems strong and working well.

MAJOR PARTS OF THE DIGESTIVE SYSTEM

Mouth – Where digestion begins! Teeth chew food into small pieces.

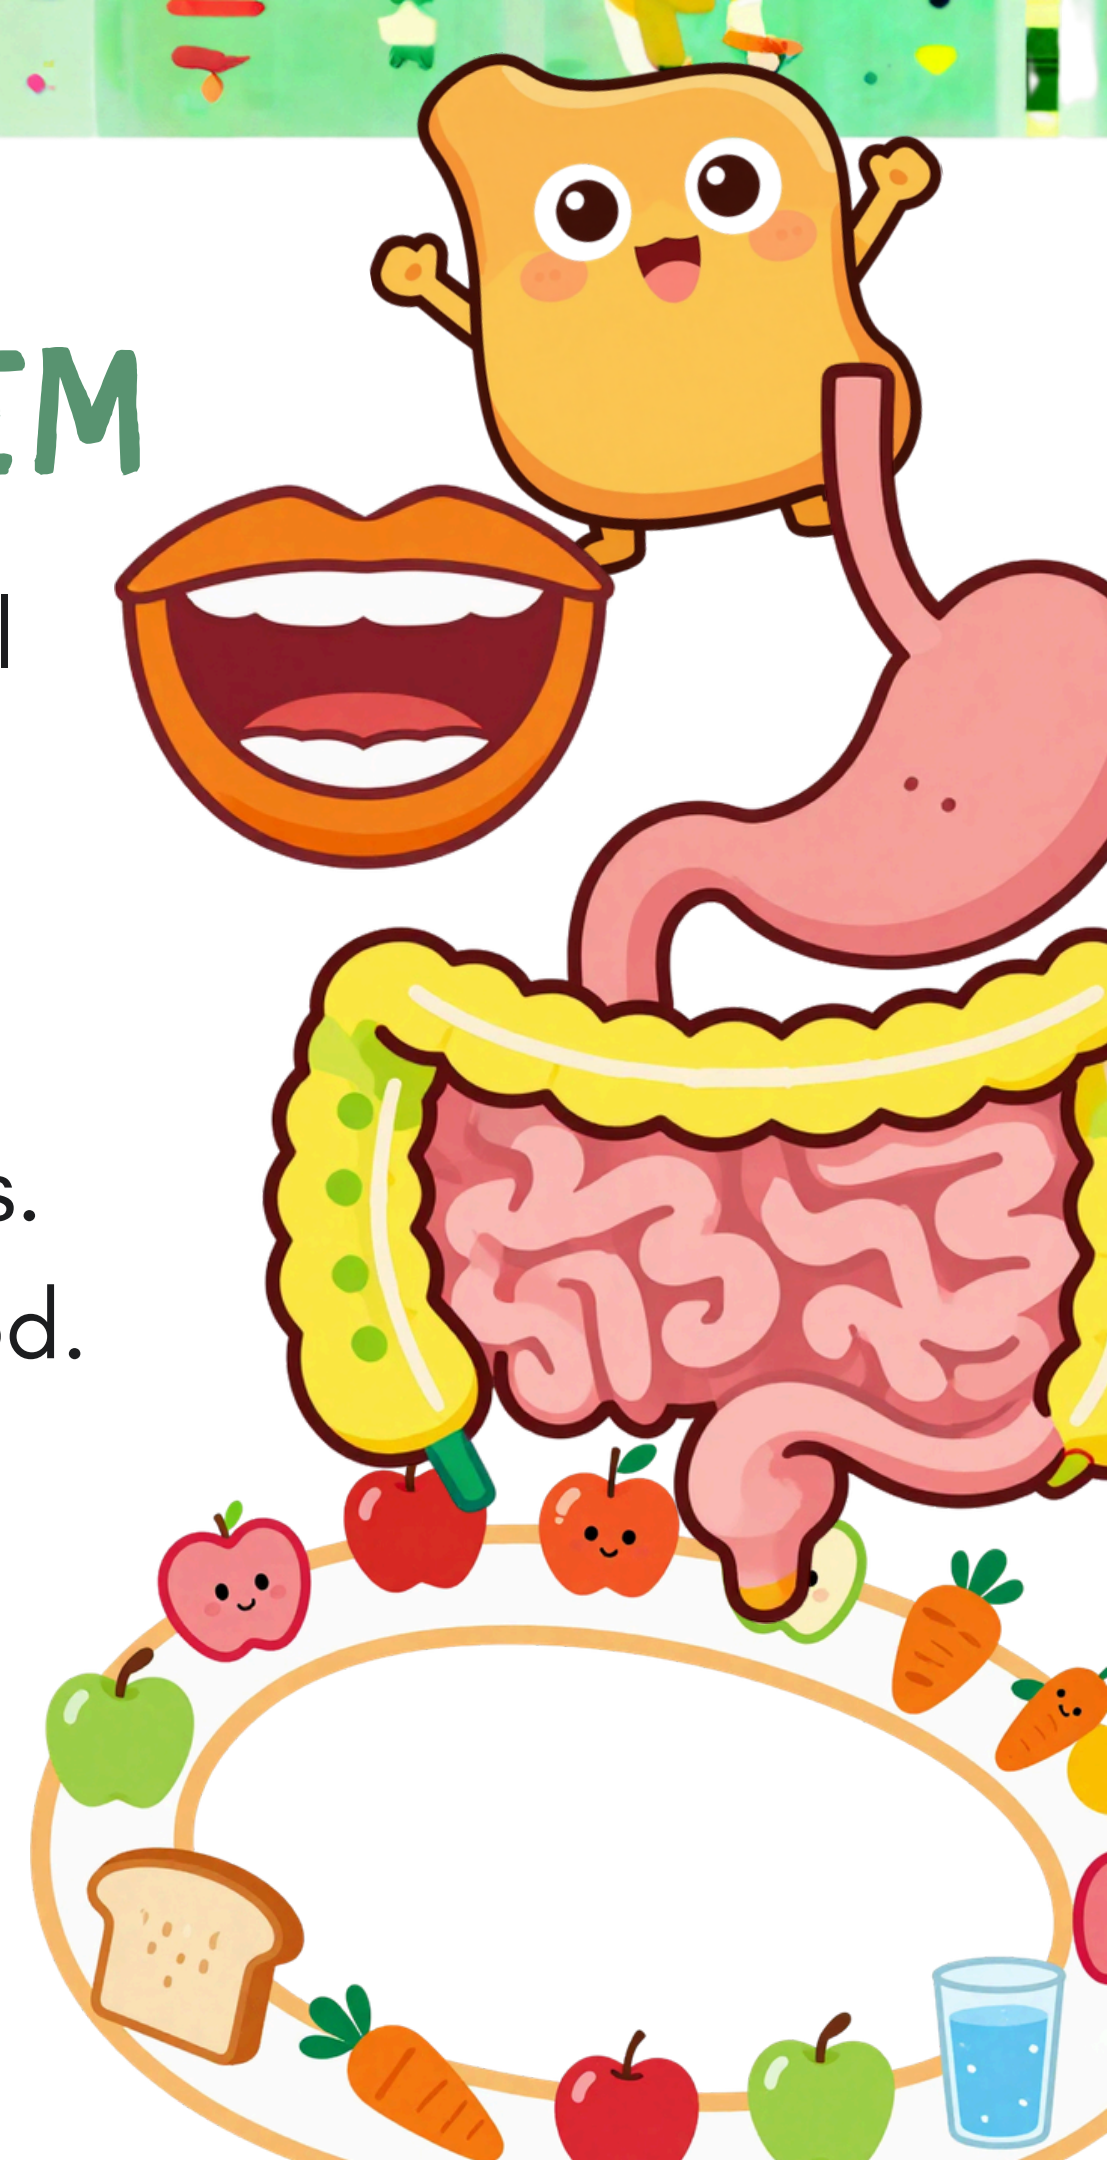

Esophagus – The tube that moves food from your mouth to your stomach.

Stomach – Mixes and breaks down food using special juices.

Small Intestine – Absorbs nutrients from food into your blood.

Large Intestine – Absorbs water; moves waste along.

Rectum & Anus – Store and release solid waste from the body.

CARING FOR YOUR DIGESTIVE SYSTEM

Eat a variety of healthy foods every day.

Drink enough water to stay hydrated.

Eat foods rich in fiber like fruits and veggies.

Wash your hands before eating.

Avoid spoiled or unsafe food.

Be active and exercise regularly!

MAJOR PARTS OF THE RESPIRATORY SYSTEM

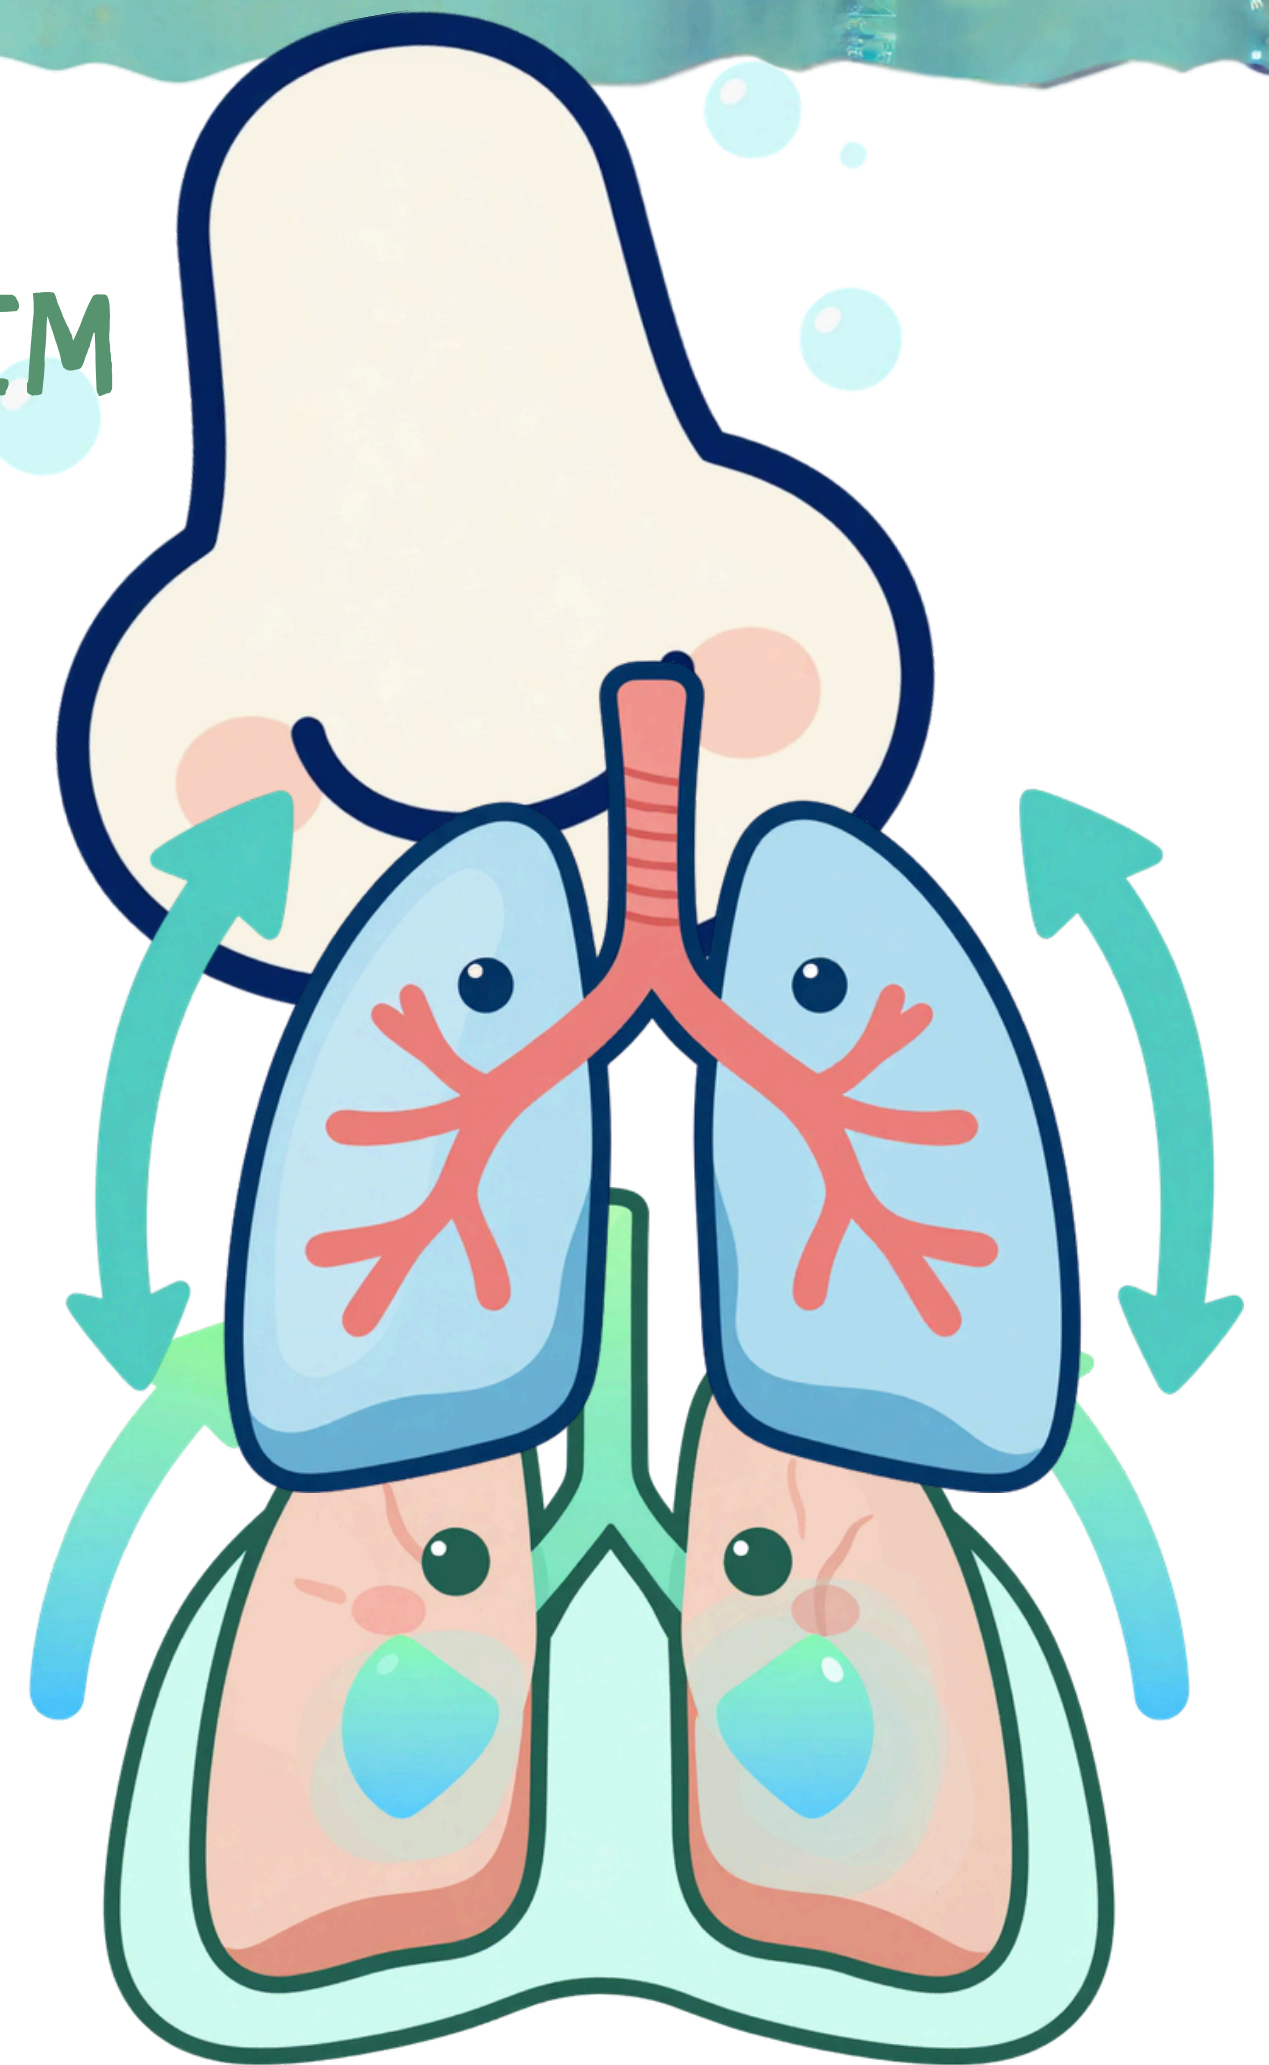

Nose & Mouth – Where air enters the body.

Trachea – The tube that carries air down to the lungs.

Bronchi – Two branches that send air into each lung.

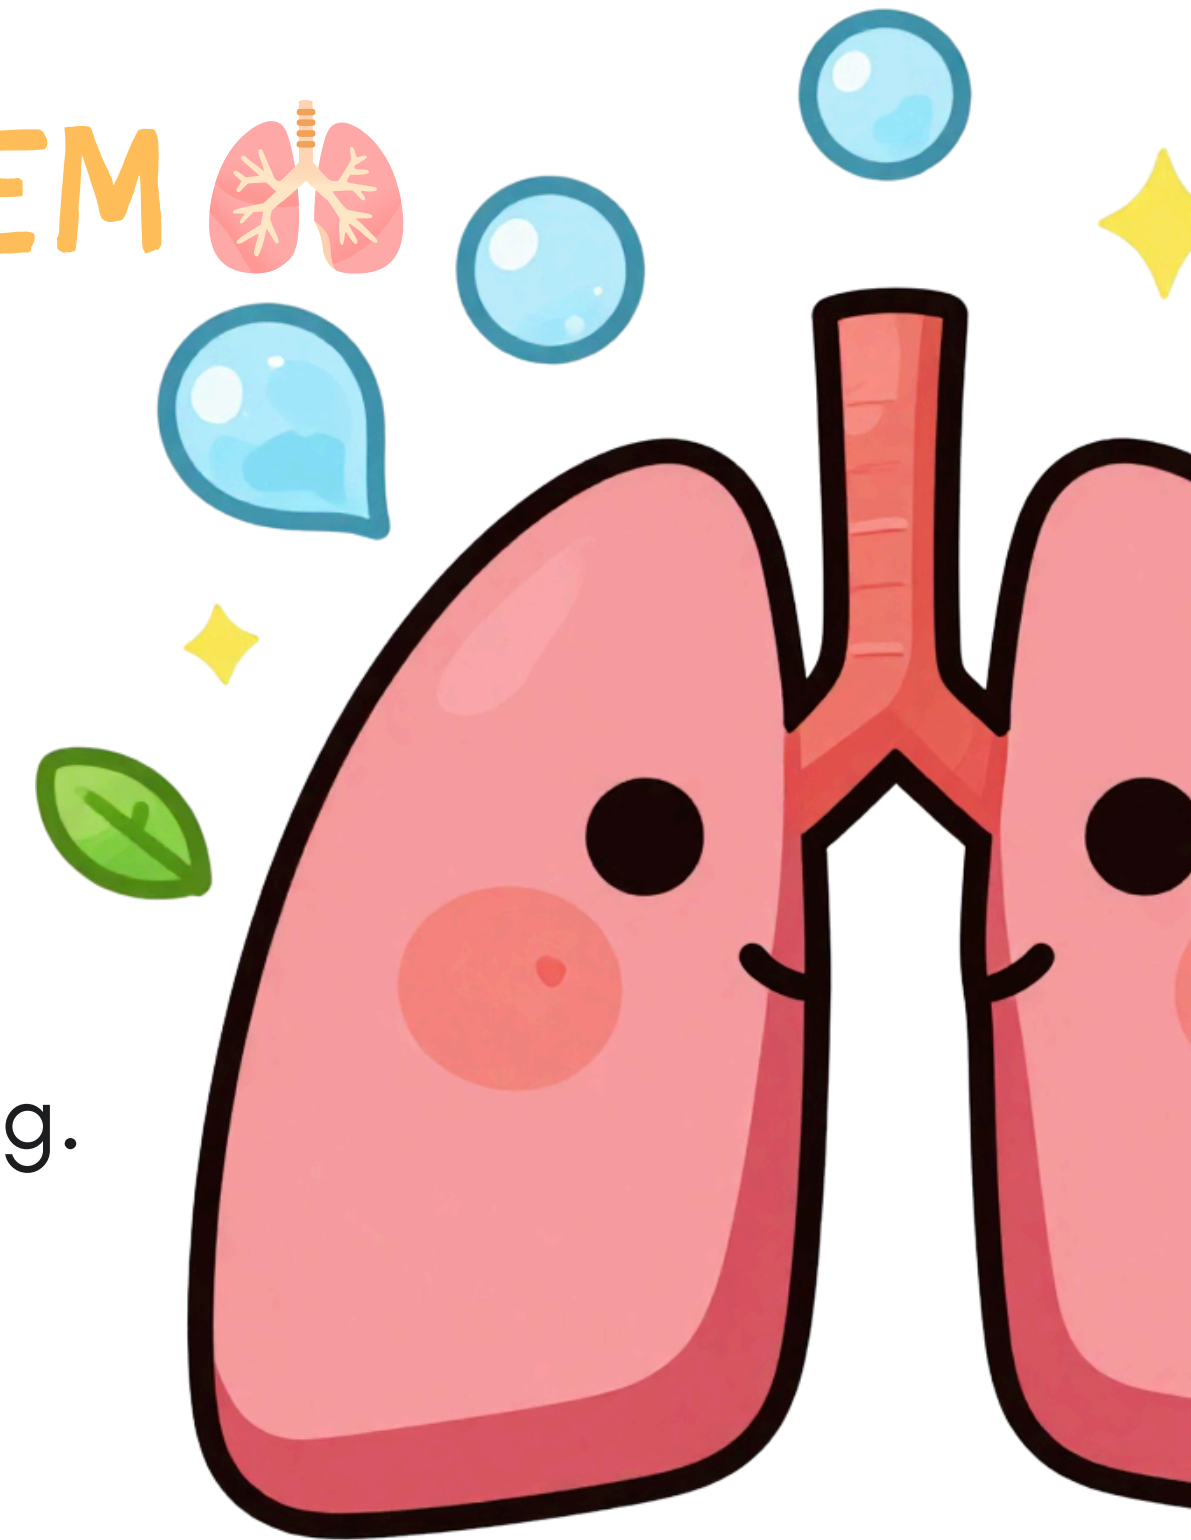

Lungs – Where oxygen enters the blood and carbon dioxide leaves.

Diaphragm – The muscle that helps you breathe in and out.

CARING FOR YOUR RESPIRATORY SYSTEM

- 🚭 Avoid cigarette smoke and harmful fumes.
- ☁️ Stay away from polluted or dusty air.
- 🧹 Keep your surroundings clean.
- 🏃 Exercise regularly to strengthen your lungs.
- 🤧 Cover your mouth and nose when sneezing or coughing.
- 🧼 Wash your hands often to prevent infections.

THE REPRODUCTIVE SYSTEM — WHAT IT DOES

Males and females have different parts that work together for human reproduction!

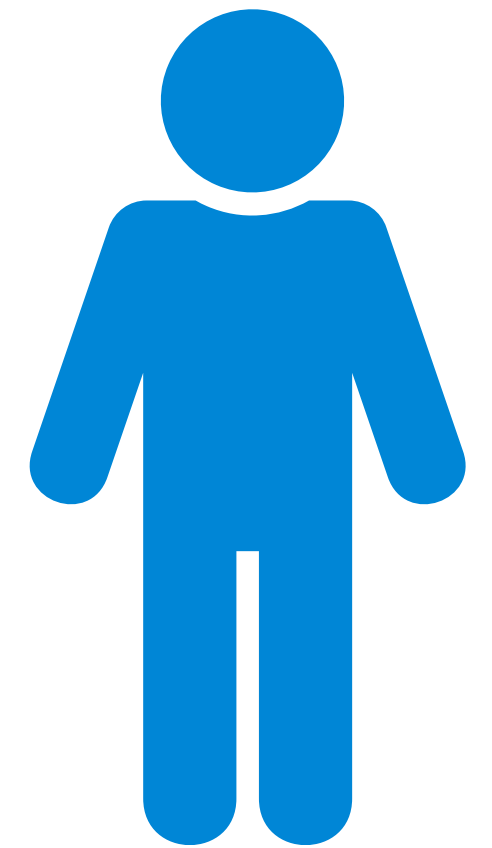

MALE REPRODUCTIVE SYSTEM

Testes – produce sperm cells (tiny cells needed for reproduction)

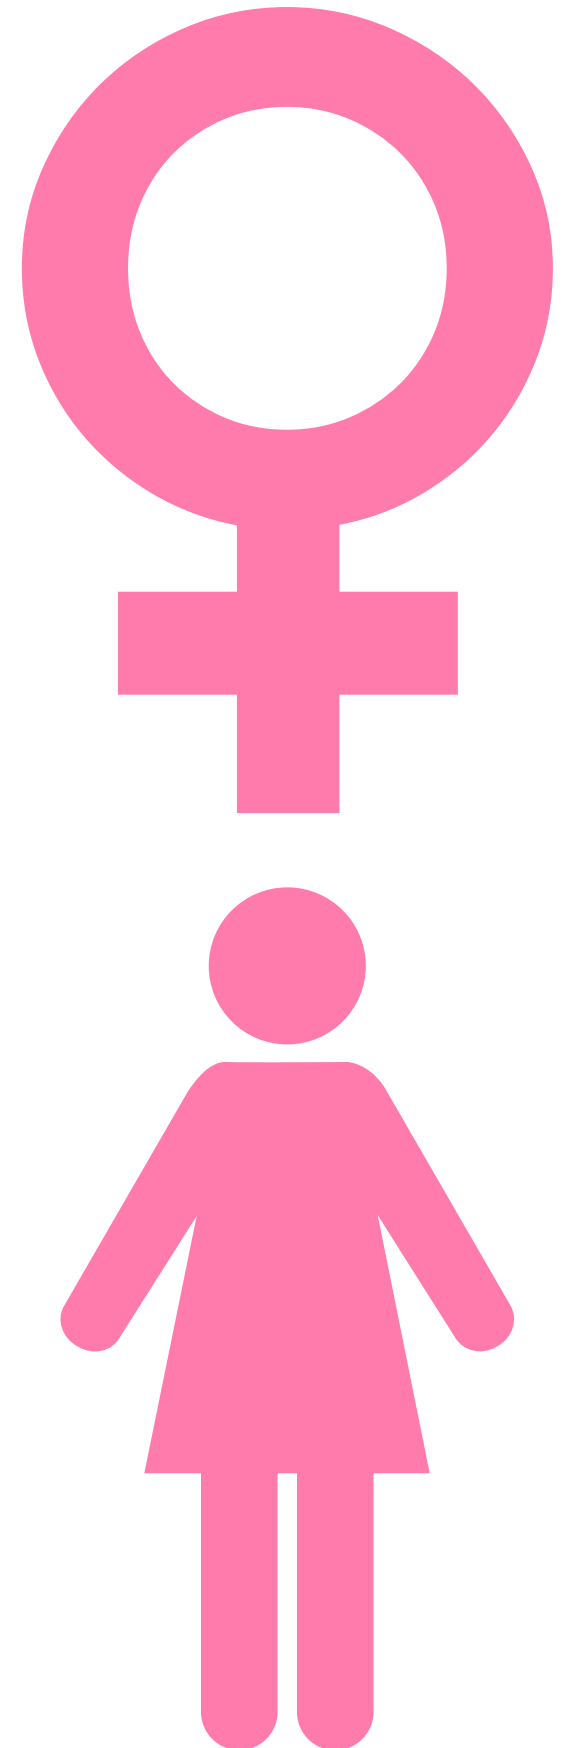

Penis – helps release urine out of the body; also releases semen

Scrotum – the pouch that holds and protects the testes

FEMALE REPRODUCTIVE SYSTEM PARTS

-  Ovaries – produce egg cells (ova)
-  Fallopian Tubes – carry egg cells from the ovaries to the uterus
-  Uterus – where a baby grows and develops
-  Vagina – the passageway that connects the uterus to the outside of the body

CARING FOR YOUR REPRODUCTIVE SYSTEM

Keep your body clean every day.

Practice proper hygiene habits.

Wear clean, comfortable clothes.

Eat nutritious food and stay active.

Exercise regularly to stay healthy and strong.

Tell a trusted adult if something feels wrong.

HOW BODY SYSTEMS WORK TOGETHER!

 Digestive System breaks down food and delivers nutrients to the blood.

 Respiratory System brings in oxygen and removes carbon dioxide.

 Circulatory System carries nutrients AND oxygen to every cell in the body!

ACTIVITY 1 — MATCH THE PART!

Look at the pictures of body parts and match each one to its function!

Takes in oxygen and removes carbon dioxide
Mixes and breaks down food

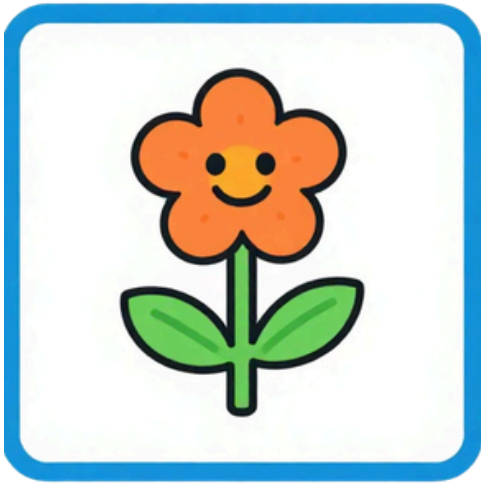

Takes in oxygen and removes carbon dioxide

Can you explain WHY each part does its job?

ACTIVITY 2 — WHICH SYSTEM?

Reproductive System

Digestive System

Respiratory System

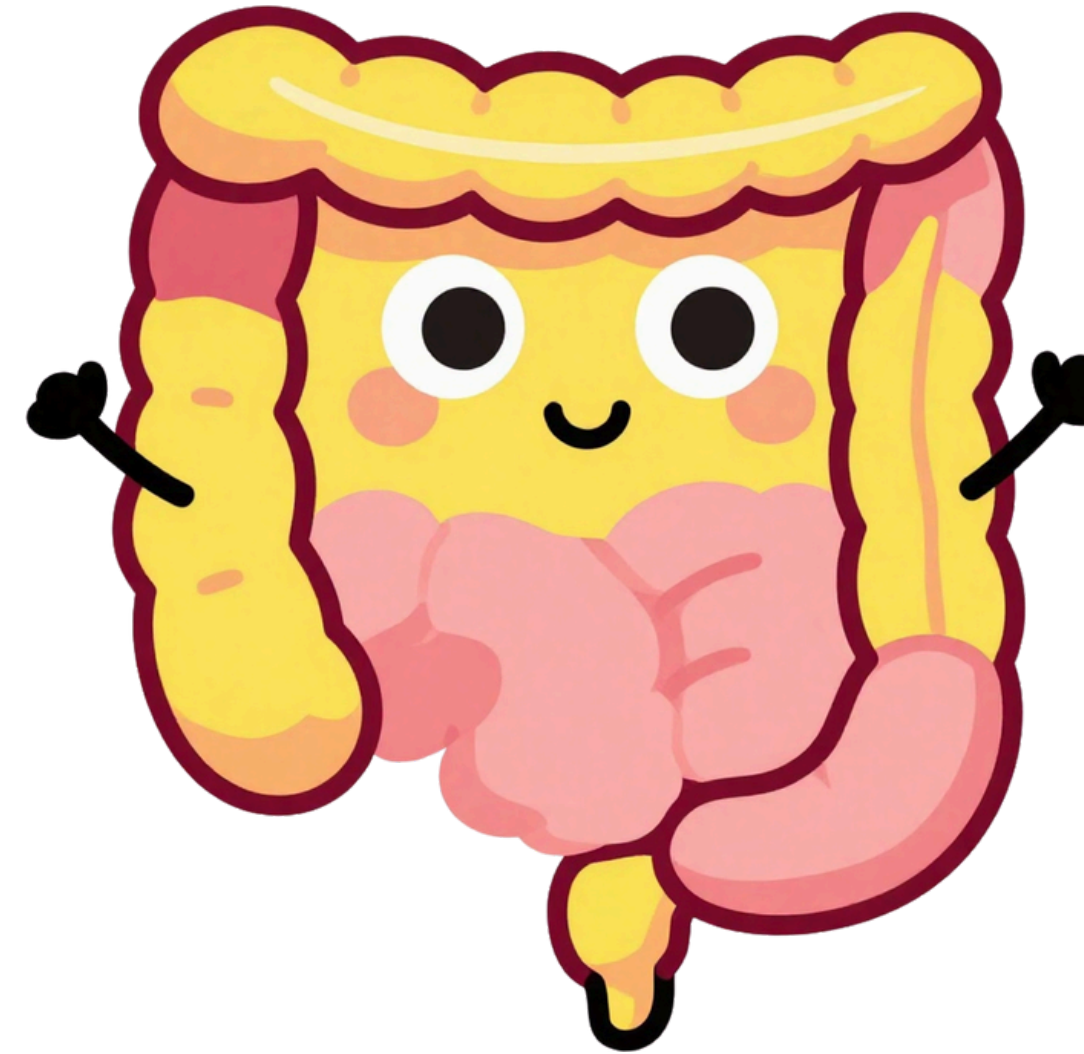

ASSESSMENT QUESTION 1

1. Which organ absorbs nutrients from food?

- A. Stomach
- B. Small Intestine
- C. Large Intestine
- D. Esophagus

2. What is the main organ of the respiratory system?

- A. Heart
- B. Lungs
- C. Stomach
- D. Brain

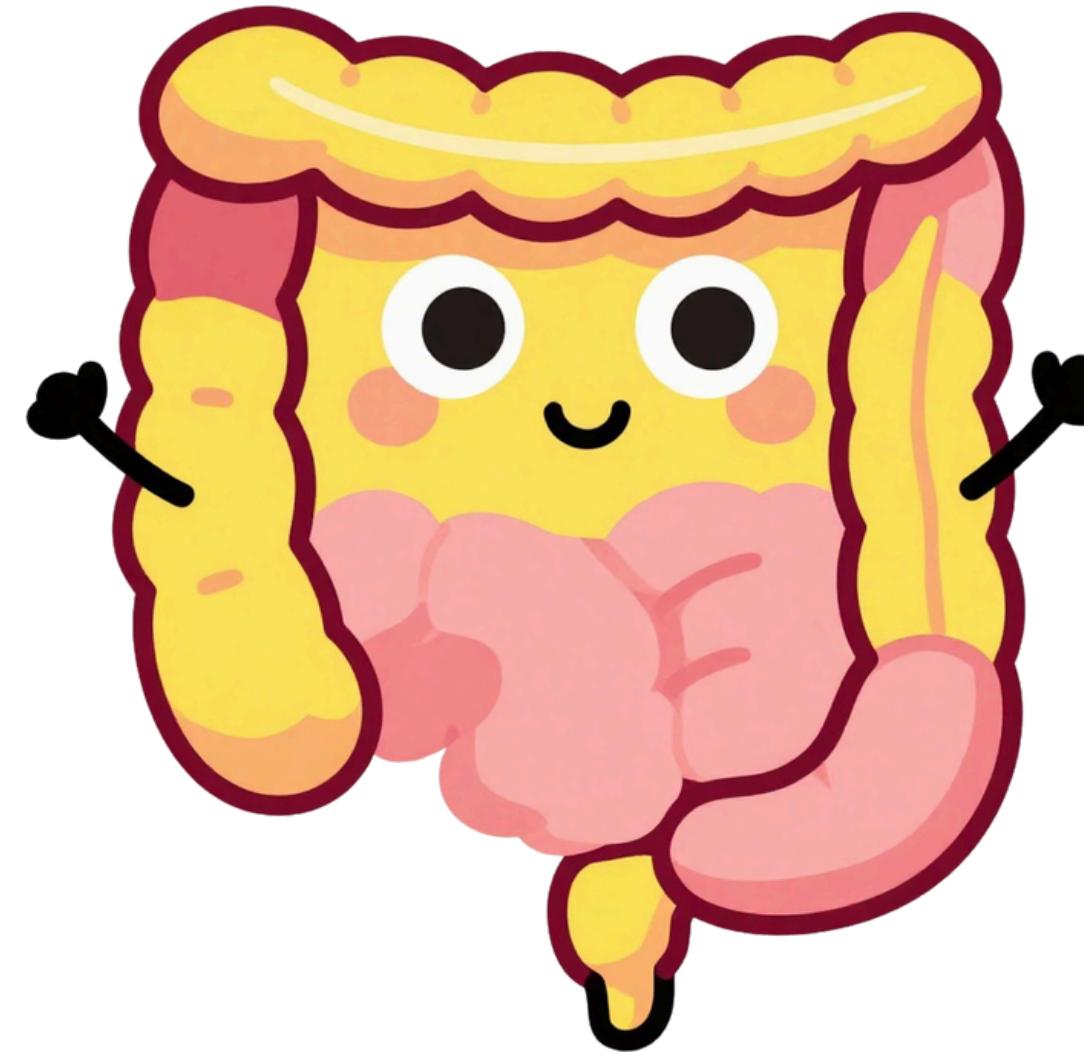

ASSESSMENT QUESTION 1

3. What does the respiratory system do?

- A. Breaks down food into nutrients
- B. Takes in oxygen and removes carbon dioxide
- C. Produces sperm and egg cells
- D. Pumps blood through the body

4. Which female organ produces egg cells?

- A. Uterus
- B. Ovaries
- C. Fallopian Tube
- D. Vagina

Which habit helps keep the digestive system healthy?

- A. Staying up late every night
- B. Eating nutritious food and drinking water
- C. Eating lots of junk food
- D. Avoiding all physical activity

ANSWER KEY

1. Small Intestine
2. Lungs
3. Takes in oxygen and removes carbon dioxide
4. Ovaries
5. Eating nutritious foods and drinking enough water

THANK YOU!
