

APPENDIX G: ESSENTIAL SOURCE CODE & DEPLOYMENT AUTOMATION

ILikeSci: Interactive Science & Classroom Learning Engine

APPENDIX G: ESSENTIAL SOURCE CODE & DEPLOYMENT AUTOMATION

ILikeSci: Interactive Science & Classroom Learning Engine

Academic Capstone Project

Institution: Laguna State Polytechnic University (LSPU), San Pablo City Campus

College: College of Computer Studies — Bachelor of Science in Information Technology

Authors: Abril, Christian Lloyd | Millera, Justine | Olidan, Marc Joshua

Target School: Bay Central Elementary School (BCES), Bay, Laguna

Target Curriculum: DepEd K-12 Science Curriculum (Grades 3–6)

Version: 2.4.0 Production Release | Academic Year 2026–2027

1. ARCHITECTURAL OVERVIEW & CORE FILE MANIFEST

The following manifest enumerates the essential server-side scripts, database controllers, deployment automation scripts, and test suites required to run, configure, and deploy the ILikeSci platform across both standalone low-end laptops and cloud infrastructure:

```
ILikeSci/
├─ db.php                # Dual-engine PDO abstraction (SQLite WAL & MySQL)
├─ init_db.php           # Automated schema migration & table creator
├─ auth.php              # Secure role-based login & user management
├─ xlsx_records_api.php  # DepEd Order No. 8, s. 2015 Transmutation & E-Class grad
ing
├─ student_api.php       # Official masterlist CRUD & cascading referential integr
ity
├─ pptx_api.php          # Slide delivery, image indexing, and presentation viewer
├─ ai_config.php         # Google Gemini 3.8 Flash & Groq AI configuration
├─ ai_api.php            # Server-side AI proxy, caching, and rate-limiting
├─ start_localhost.bat   # Zero-friction XAMPP automated localhost launcher
├─ start_ilikesci.bat    # Ultra-low RAM standalone portable launcher (PHP built-i
n server)
├─ deploy_to_ec2.ps1     # Automated cloud deployment & SSH remote verification
├─ .htaccess             # Apache security, compression, and script execution prev
ention
├─ test_production_readiness.php # 53-point automated production verification test suite
├─ scratch/test_safeguards.php # 15-point teacher isolation & foolproofing safeguard tes
t suite
```

2. DATABASE CONNECTION & DUAL-ENGINE ABSTRACTION LAYER ([db.php](#))

The [db.php](#) file manages persistent PDO connections, dynamically switching between high-performance local SQLite (WAL mode) and enterprise MySQL.

```

<?php
/**
 * ILikeSci - Dual-Engine Database Connection & Abstraction Layer
 *
 * Supports seamless switching between:
 * 1. SQLite (Default / Standalone / Low-End Hardware Mode)
 * 2. MySQL (XAMPP / Production Server Mode)
 */

if (!defined('DB_ENGINE')) {
    define('DB_ENGINE', 'SQLITE'); // Options: 'SQLITE' or 'MYSQL'

define('SQLITE_FILE', __DIR__ . '/ilikesci_db.sqlite');
define('MYSQL_HOST', '127.0.0.1');
define('MYSQL_PORT', 3306);
define('MYSQL_NAME', 'ilikesci_db');
define('MYSQL_USER', 'root');
define('MYSQL_PASS', '');

function is_sqlite() {
    return strtoupper(DB_ENGINE) === 'SQLITE';

function get_db_connection() {
    static $pdo = null;
    if ($pdo !== null) {
        return $pdo;

    try {
        if (is_sqlite()) {
            $pdo = new PDO('sqlite:' . SQLITE_FILE, null, null, [
                PDO::ATTR_ERRMODE           => PDO::ERRMODE_EXCEPTION,
                PDO::ATTR_DEFAULT_FETCH_MODE => PDO::FETCH_ASSOC,
                PDO::ATTR_TIMEOUT            => 5
            ]);
            // Performance optimizations for low-end hardware:
            // WAL mode allows concurrent readers and writers without database locking
            $pdo->exec("PRAGMA journal_mode = WAL;");
            $pdo->exec("PRAGMA synchronous = NORMAL;");
            $pdo->exec("PRAGMA foreign_keys = ON;");
            $pdo->exec("PRAGMA temp_store = MEMORY;");
            $pdo->exec("PRAGMA cache_size = -64000;"); // 64MB cache
        } else {
            $dsn = "mysql:host=" . MYSQL_HOST . ";port=" . MYSQL_PORT . ";dbname=" . MYSQL_NAME . ";charset=utf8mb4";
            $pdo = new PDO($dsn, MYSQL_USER, MYSQL_PASS, [
                PDO::ATTR_ERRMODE           => PDO::ERRMODE_EXCEPTION,
                PDO::ATTR_DEFAULT_FETCH_MODE => PDO::FETCH_ASSOC,
                PDO::ATTR_EMULATE_PREPARES  => false
            ]);

        catch (PDOException $e) {
            // Graceful fallback to SQLite if MySQL connection fails
            if (!is_sqlite()) {
                try {
                    $pdo = new PDO('sqlite:' . SQLITE_FILE, null, null, [

```

```

        PDO::ATTR_ERRMODE          ⇒ PDO::ERRMODE_EXCEPTION,
        PDO::ATTR_DEFAULT_FETCH_MODE ⇒ PDO::FETCH_ASSOC
    });
    $pdo→exec("PRAGMA journal_mode = WAL;");
    return $pdo;
    catch (PDOException $sqle) {
        die(json_encode(['status' ⇒ 'error', 'message' ⇒ 'Database connection failed: ' . $sqle→getMessage()]));
    }

    die(json_encode(['status' ⇒ 'error', 'message' ⇒ 'Database connection failed: ' . $sqle→getMessage()]));
}

return $pdo;

// Global active instance
$pdo = get_db_connection();
?>

```

3. DATABASE SCHEMA INITIALIZATION & MIGRATION ENGINE (`init_db.php`)

Executes automated table creation, foreign key constraints, and indexing across all 14 core database tables.

```

<?php
/**
 * ILikeSci - Database Schema_INITIALIZER & Migration Script
 */
require_once __DIR__ . '/db.php';

$pdo = get_db_connection();
$isSqlite = is_sqlite();

$pk = $isSqlite ? "INTEGER PRIMARY KEY AUTOINCREMENT" : "INT AUTO_INCREMENT PRIMARY KEY";
$now = $isSqlite ? "DATETIME DEFAULT CURRENT_TIMESTAMP" : "DATETIME DEFAULT CURRENT_TIMESTAMP";

$tables = [
    // 1. Users Table
    "CREATE TABLE IF NOT EXISTS users (
        id $pk,

    "CREATE INDEX IF NOT EXISTS idx_grades_student_quarter ON student_grades(student_id, quarter);"
];

foreach ($indices as $idxSql) {
    try { $pdo->exec($idxSql); } catch (Exception $e) {}
}

echo "=== ILikeSci Database Initialized Successfully ===\n";
?>

```

4. USER AUTHENTICATION & SESSION CONTROLLER (auth.php)

Enforces secure password verification, credential management, and role-based access control.

```
<?php
/**
 * ILikeSci - User Authentication & Session API Controller
 */
require_once __DIR__ . '/db.php';

header("Content-Type: application/json; charset=utf-8");
header("Access-Control-Allow-Origin: *");
header("Access-Control-Allow-Methods: GET, POST, OPTIONS");
header("Access-Control-Allow-Headers: Content-Type, X-Current-User");

if ($_SERVER['REQUEST_METHOD'] === 'OPTIONS') { exit(0); }

$method = $_SERVER['REQUEST_METHOD'];
$pdo = get_db_connection();

if ($method === 'POST') {
    $input = json_decode(file_get_contents('php://input'), true) ?: $_POST;
    $username = trim($input['username'] ?? '');
    $password = $input['password'] ?? '';

    if (empty($username) || empty($password)) {
        echo json_encode(['status' => 'error', 'message' => 'Username and password required.']);
        exit;
    }

    $stmt = $pdo->prepare("SELECT * FROM users WHERE username = ?");
    $stmt->execute([$username]);
    $user = $stmt->fetch(PDO::FETCH_ASSOC);

    if ($user && (password_verify($password, $user['password']) || $password === $user['password'])) {
        unset($user['password']); // Never expose hashes
        echo json_encode(['status' => 'success', 'user' => $user]);
    } else {
        echo json_encode(['status' => 'error', 'message' => 'Invalid username or password.']);
    }

    exit;
}

if ($method === 'GET') {
    $stmt = $pdo->query("SELECT id, username, role, display_name, assigned_grade, assigned_section, created_at FROM users");
    $users = $stmt->fetchAll(PDO::FETCH_ASSOC);
    echo json_encode(['status' => 'success', 'users' => $users]);
    exit;
}

?>
```

5. DEPED ORDER NO. 8 E-CLASS RECORDS & TRANSMUTATION ENGINE

(`xlsx_records_api.php`)

Implements the official Department of Education Order No. 8, s. 2015 grading formula and score transmutation table for Elementary Science.

```

<?php
/**
 * ILikeSci - DepEd Order No. 8, s. 2015 E-Class Records Engine
 */
require_once __DIR__ . '/db.php';

header("Content-Type: application/json; charset=utf-8");
$pdo = get_db_connection();

/**
 * Official DepEd Science Weights:
 * Written Work: 40% | Performance Tasks: 40% | Quarterly Exam: 20%
 */
function calculate_initial_grade($wwScores, $wwHighest, $ptScores, $ptHighest, $qaScore, $qaHighest) {
    $wwTotal = array_sum($wwScores);
    $wwMax = array_sum($wwHighest) ?: 1;
    $wwPercentage = ($wwTotal / $wwMax) * 100;
    $wwWeighted = $wwPercentage * 0.40;

    $ptTotal = array_sum($ptScores);
    $ptMax = array_sum($ptHighest) ?: 1;
    $ptPercentage = ($ptTotal / $ptMax) * 100;
    $ptWeighted = $ptPercentage * 0.40;

    $qaPercentage = ($qaHighest > 0) ? (($qaScore / $qaHighest) * 100) : 0;
    $qaWeighted = $qaPercentage * 0.20;

    return round($wwWeighted + $ptWeighted + $qaWeighted, 2);
}

/**
 * DepEd Official Transmutation Table (DepEd Order No. 8, s. 2015)
 */
function transmute_grade($initialGrade) {
    if ($initialGrade ≥ 100.0) return 100;
    if ($initialGrade ≥ 98.40) return 99;
    if ($initialGrade ≥ 96.80) return 98;
    if ($initialGrade ≥ 95.20) return 97;

    );
    $transmuted = transmute_grade($initial);
    echo json_encode(['status' ⇒ 'success', 'initial_grade' ⇒ $initial, 'transmuted_grade' =
⇒ $transmuted]);
    exit;
}
?>

```

6. STUDENT ROSTER & CASCADING INTEGRITY CONTROLLER

(student_api.php)

Manages learner masterlist CRUD, enforces teacher grade isolation, and automatically cascades student deletion to related grade and recitation tables.

```

<?php
/**
 * ILikeSci - Student Masterlist & Referential Integrity Controller
 */
require_once __DIR__ . '/db.php';
header("Content-Type: application/json; charset=utf-8");

$pdo = get_db_connection();
$method = $_SERVER['REQUEST_METHOD'];

// Handle GET: Retrieve student roster filtered by Grade/Section
if ($method === 'GET') {
    $grade = $_GET['grade'] ?? '';
    $section = $_GET['section'] ?? '';

    $sql = "SELECT * FROM students WHERE grade ≠ '7'";
    $params = [];
    if (!empty($grade) && $grade ≠ 'all') {
        $sql .= " AND grade = ?";
        $params[] = $grade;
    }

    if (!empty($section) && $section ≠ 'all') {
        $sql .= " AND section = ?";
        $params[] = $section;
    }

    $sql .= " ORDER BY section ASC, name ASC";

    $stmt = $pdo->prepare($sql);
    $stmt->execute($params);
    echo json_encode(['status' => 'success', 'students' => $stmt->fetchAll(PDO::FETCH_ASSOC)]);
    exit;

// Handle DELETE: Cascading referential deletion
if ($method === 'DELETE' || ($method === 'POST' && ($_POST['action'] ?? '') === 'delete')) {
    $input = json_decode(file_get_contents('php://input'), true) ?: $_POST;
    $id = intval($input['id'] ?? ($_GET['id'] ?? 0));

    if ($id ≤ 0) {
        echo json_encode(['status' => 'error', 'message' => 'Valid Student ID required.']);
        exit;
    }

    $pdo->beginTransaction();
    try {
        // Cascade delete related dependencies
        $pdo->prepare("DELETE FROM student_grades WHERE student_id = ?")->execute([$id]);
        $pdo->prepare("DELETE FROM recitation_records WHERE student_id = ?")->execute([$id]);
        $stmt = $pdo->prepare("DELETE FROM students WHERE id = ?");
        $stmt->execute([$id]);
        $pdo->commit();
        echo json_encode(['status' => 'success', 'message' => 'Student and linked records removed.']);
    } catch (Exception $e) {
        $pdo->rollBack();
        echo json_encode(['status' => 'error', 'message' => 'Deletion failed: ' . $e->getMessage()]);
    }
}

```

```
exit;
```

```
?>
```

7. VISUAL SLIDE PRESENTATION ENGINE (`pptx_api.php`)

Indexes curriculum slide presentations, verifies teacher grade authorization, and serves high-resolution slide images.

```

<?php
/**
 * ILikeSci - Visual Slide Presentation API
 */
require_once __DIR__ . '/db.php';
header("Content-Type: application/json; charset=utf-8");

$pdo = get_db_connection();
$action = $_GET['action'] ?? ($_POST['action'] ?? 'list');

if ($action === 'list') {
    $grade = $_GET['grade'] ?? '';
    $sql = "SELECT * FROM pptx_uploads WHERE 1=1";
    $params = [];
    if (!empty($grade) && $grade !== 'all') {
        $sql .= " AND grade = ?";
        $params[] = $grade;

        $sql .= " ORDER BY id ASC";
        $stmt = $pdo->prepare($sql);
        $stmt->execute($params);
        echo json_encode(['status' => 'success', 'presentations' => $stmt->fetchAll(PDO::FETCH_ASSOC)]);
        exit;
    }

    if ($action === 'slides') {
        $id = intval($_GET['id'] ?? 0);
        $stmt = $pdo->prepare("SELECT * FROM pptx_uploads WHERE id = ?");
        $stmt->execute([$id]);
        $deck = $stmt->fetch(PDO::FETCH_ASSOC);

        if (!$deck) {
            echo json_encode(['status' => 'error', 'message' => 'Presentation not found.']);
            exit;
        }

        $slideDir = __DIR__ . '/pptx_slides/' . $deck['filename'];
        $images = glob($slideDir . "/*.{png,jpg,webp}", GLOB_BRACE);
        natsort($images);

        $slides = [];
        foreach ($images as $img) {
            $slides[] = 'pptx_slides/' . $deck['filename'] . '/' . basename($img);
        }

        echo json_encode(['status' => 'success', 'deck' => $deck, 'slides' => array_values($slides)]);
        exit;
    }
}
?>

```

8. AI TEACHING ASSISTANT CONFIGURATION & PROXY (`ai_config.php` & `ai_api.php`)

Configures and connects Google Gemini 3.8 Flash with full DepEd curriculum system prompts and caching.

8.1 Configuration (`ai_config.php`)

```
<?php
/**
 * ILikeSci - AI Configuration
 */
define('AI_ENABLED', true);
define('AI_PROVIDER', 'gemini');

// Check for local uncommitted key file first
if (file_exists(__DIR__ . '/ai_key.local.php')) {
    require_once __DIR__ . '/ai_key.local.php';

// Free-tier API Credentials (Loaded from local config or environment)
if (!defined('AI_API_KEY_GROQ')) { define('AI_API_KEY_GROQ', getenv('GROQ_API_KEY') ?: '');
if (!defined('AI_API_KEY_GEMINI')) { define('AI_API_KEY_GEMINI', getenv('GEMINI_API_KEY') ?:
'');

define('AI_MODEL_GROQ', 'llama-3.3-70b-versatile');
define('AI_MODEL_GEMINI', 'gemini-3.8-flash');
define('AI_RATE_LIMIT', 10);
define('AI_TIMEOUT', 15);

        include fastcgi_params;

    }

    listen 443 ssl;
    ssl_certificate /etc/letsencrypt/live/ilikesci.duckdns.org/fullchain.pem;
    ssl_certificate_key /etc/letsencrypt/live/ilikesci.duckdns.org/privkey.pem;

}

server {
    listen 80;
    server_name ilikesci.duckdns.org 54.205.53.83;
    if ($host = ilikesci.duckdns.org) {
        return 301 https://$host$request_uri;
    }

    return 404;

}
```

12. AUTOMATED PRODUCTION READINESS TEST SUITE

(test_production_readiness.php)

A comprehensive 53-point test suite executing on every deployment.

```

<?php
/**
 * ILikeSci - 53-Point Production Readiness Audit Suite
 */
require_once __DIR__ . '/db.php';
$pdo = get_db_connection();
$passed = 0; $total = 0;

function run_test($desc, $cond) {
    global $passed, $total;
    $total++;
    if ($cond) { $passed++; echo " [PASS] $desc\n";
    else { echo " [FAIL] $desc\n";

echo "=== ILIKESCI PRODUCTION AUDIT ===\n";

// 1. Database
run_test("Database PDO connection active", $pdo instanceof PDO);
run_test("SQLite WAL mode active", is_sqlite());

// 2. Authentication
$stmt = $pdo->prepare("SELECT COUNT(*) FROM users WHERE username = 'oyo'");
$stmt->execute();
run_test("Admin user 'oyo' seeded", $stmt->fetchColumn() > 0);

// 3. Students
$stmtSt = $pdo->query("SELECT COUNT(*) FROM students WHERE grade ≠ '7'");
run_test("BCES masterlist imported (≥ 400)", $stmtSt->fetchColumn() ≥ 400);

// 4. DepEd Calculation
require_once __DIR__ . '/xlsx_records_api.php';
$grade = transmute_grade(calculate_initial_grade([20], [20], [25], [25], 50, 50));
run_test("DepEd 100% transmutations yields 100", $grade === 100);

// 5. Performance
$t0 = microtime(true);
for ($i = 0; $i < 100; $i++) { $pdo->query("SELECT id FROM students LIMIT 1");
$t1 = microtime(true);
run_test("100 queries execute in < 250ms", (($t1 - $t0) * 1000) < 250);

echo "TEST RESULTS: $passed / $total PASSED\n";
?>

```

13. ACCESS CONTROL & FOOLPROOFING VERIFICATION SUITE

(`scratch/test_safeguards.php`)

Validates security safeguards, teacher load protection, and deletion cascading.

```

<?php
/**
 * ILikeSci – Foolproof & Usability Safeguards Test Suite (15 Audits)
 */
require_once __DIR__ . '/../db.php';
$pdo = get_db_connection();
$passed = 0;

function test_guard($desc, $expr) {
    global $passed;
    if ($expr) { $passed++; echo " [PASS] $desc\n";
    else { echo " [FAIL] $desc\n";

echo "=== FOOLPROOF & SAFEGUARD AUDITS ===\n";

// Audit 1: Teacher Coney Load
$stmt = $pdo->prepare("SELECT assigned_grade FROM users WHERE username = 'coney'");
$stmt->execute();
test_guard("Teacher 'coney' locked to Grade 4", $stmt->fetchColumn() === '4');

// Audit 2: Cascading Deletion
$pdo->prepare("INSERT INTO students (id, name, grade, section) VALUES (999999, 'Test Delete',
'4', 'Einstein')")->execute();
$pdo->prepare("INSERT INTO student_grades (student_id, quarter, initial_grade) VALUES (999999,
1, 85)")->execute();

$pdo->prepare("DELETE FROM student_grades WHERE student_id = 999999")->execute();
$pdo->prepare("DELETE FROM students WHERE id = 999999")->execute();
$checkGrades = $pdo->query("SELECT COUNT(*) FROM student_grades WHERE student_id = 999999")->f
etchColumn();
test_guard("Cascading student deletion leaves zero orphaned records", $checkGrades == 0);

echo "SAFEGUARDS VERIFIED: $passed PASSED\n";
?>

```
